---

The following activity has been reported by our field agent network.

**District Group Rho:**

- Chillwack, BC, Canada: Cell towers have identified a cellular device travelling distances of up to 8 kilometers in under a second. Several locations coincide with recent home burglary reports.

**District Group Iota:**

- Târgu Ocna, Romania: Suspected cult leader Person of Interest (PoI) Marcel Enescu has died. Prior investigations have led us to believe his estate contains an anomalous object.

P.S. Attached are the agent cards for your newly assigned MTF and ARU teams, as well as an anomaly card for the anomalous object you contained during your orientation mission. Since they still remain in the custody of the Acquisitions Department, they have given provisional item numbers denoted by the "p" (e.g. SCP-311p) along with preliminary containment, disruption, and risk classifications until they can be integrated into an appropriate permanent containment site. Feel free to submit more research inquiries into these items as you see fit.

Good luck.
