

THE SCP FOUNDATION

Department of Acquisitions

Welcome Director Montagne,

Congratulations on your recent promotion to Director of the Acquisitions Department, district group Rho. I am your Designated Mediator, you can call me Delta. My job is to act as your secretary to coordinate orders between you and your subordinates.

Your duties as Acquisition Director are to orchestrate the investigation and initial containment of suspected anomalous phenomena discovered by SCP Foundation field agents and direct their initial research. The SCP Foundation, as you know, safeguards humanity from things which do not adhere to logical reasoning, and have no place in the minds of the public. You lead the front line of the Foundation's effort to protect the world from those irrational things which might threaten its sanity.

Included in this packet is the following:

- District assignment map
- 13 Mobile Task Force dossiers
- 7 Anterior Research Unit dossiers

The district map shows which territories fall under your jurisdiction and which fall under the jurisdiction of your fellow Acquisition Directors. When field agents report anomalies in areas within your districts, it is your responsibility to act on them.

The dossiers describe agent teams which have been allocated to the Acquisitions Department. Within them, one MTF and one ARU have already been assigned to you. The rest, you must work with your fellow Director to decide who will claim which. You must each claim 5 MTFs and 3 ARUs, and no team can be claimed twice. The remaining 2 unclaimed MTFs will be reassigned elsewhere in the Foundation.

Please respond to this packet with a letter containing the following information:

- A list of the ID numbers for the 5 Mobile Task Forces that you claim, along with a callsign of your choosing for each.
- A list of the ID numbers for the 3 Anterior Research Units that you claim, along with a callsign of your choosing for each.
- Callsigns for the MTF and ARU already assigned to you.
